Mr. John Stiller  
Burlington Environmental Inc. (dba Philip Environmental)  
955 Powell Avenue SW  
Renton, WA 98055-2908

Mr. Stiller:

Re: Certification of Clean Closure of Areas Within the Interim Status Portions of Burlington Environmental Inc's Pier 91 Facility, WAD000812917

The Department of Ecology, Hazardous Waste and Toxics Reduction Section (Ecology), received the closure certification statements in Burlington Environmental Inc. dba Philip Environmental (Philip) correspondence dated April 15, 1996. The certifications were signed by Dennis R. Helgeson, P.E., of Corrosion Control Specialists of Kent Washington and representatives of Philip.

Based on observations from our site visits, and on information from the Philip correspondence, Ecology accepts the clean closure certification under the requirements of WAC 173-303-400 and by reference 40 CFR part 265.115 for the areas covered under the Interim Status Closure Plan. Philip has now satisfied the interim status closure requirements for these particular units and is no longer required to maintain financial assurance for them. However, the facility will maintain its final Part B RCRA status until all the areas covered under the final status closure plan and corrective action activities are completed to Ecology's satisfaction.

If you have any questions or comments regarding this matter, you may contact Galen Tritt at (206) 649-7280.

Sincerely,

Julie Sellick  
Section Manager  
Hazardous Waste and Toxics Reduction Program
